

AGATM STOVES

Gas, Electric and Multi-Fuel Stoves

Future-Ready Stoves From AGA

For 100 years AGA has remained at the forefront of engineering excellence with the iconic cast-iron cooker. AGA stoves have been manufactured in the UK for over 40 years and embody the same craftsmanship you'd expect from the AGA brand. Every model is assembled by hand, giving each one a personal touch and unique quality.

With a choice of electric, gas and multi-fuel models, all stoves are highly efficient to run and simple to operate. From the traditional Little Wenlock stove with its cast iron door and superior air wash system, to the Westbury with stunning high flame picture and ambient lighting; there's the perfect AGA stove for every home and modern lifestyle.

Every AGA multi-fuel stove is built with sustainability in mind. Eco-Design Compliant to 2022 standards, you can enjoy the warmth and ambience with the peace of mind that your stove is highly efficient with low emissions which help to contribute to improving air quality.

A Fuel to Suit Every Home

Electric

Electricity is the most versatile and easily controlled form of energy. It is increasingly produced from renewable sources, such as wind, water and sunlight.

AGA stoves in electric include our Ellesmere and Ludlow stoves.

Gas

Natural gas is environmentally friendly because it burns more cleanly than other fossil fuels. Natural gas is extremely reliable and offers controllable power in your appliances.

Our Ellesmere and Ludlow stoves are available in natural gas and LPG models are also available for more remote locations.

Solid Fuel

Solid fuel is not only economical but it also produces a fantastic glowing flame. Approved smokeless fuels are low emission and environmentally friendly.

Solid fuel is an efficient and economical method of heating your home 24 hours a day, whatever the weather. There are a wide range of fuels available and, in general, homes heated by solid fuel stoves can benefit from reduced condensation - helping to eliminate household mould.

Tested and Trusted

AGA stoves are designed, manufactured and tested to meet the highest levels of compliance.

AGA stoves meet all current and future legislation, including stoves which are 2022 ECO Compliant.

All of our AGA stoves are third party approved covering safety and performance and carry the UKCA mark.

Our approvals are all carried out in the UK. All multi-fuel and electric stoves have been certified by Kiwa UK for your complete peace of mind.

Find Your Ideal Stove

What should I consider when choosing my stove?

- Fuel types – Those available in your area and preferred
- Smoke control regulations – contact your local council for guidelines for your postcode
- Size of room / property to be heated – our handy guide will help with heat requirements:

To find out which stove is your perfect match, measure your room, then use this calculation to find your room size in metres³ and the heat output in kW of the stove.

$$\text{Height (m)} \times \text{Length (m)} \times \text{Width (m)} = \text{Volume} \times .0606 = \text{kW}$$

This is designed as a guide and actual requirement should always be confirmed by an experienced installation engineer.

What do I need to know when purchasing a gas or multi-fuel stove?

We recommend a full technical assessment prior to installing your stove, to consider:

- Heat outputs compared to the heat requirements
- The location of the stove within the property
- The availability or the provision of suitable flue arrangements
- The fuel type required and design
- Meeting any required ventilation requirements
- Fireplace construction and floor protection

What will my AGA Stove Retailer provide?

- Technical advice
- Presale surveys to check suitability of the chosen appliance, its positioning and fluing
- Professional installation by their own or recognised sub contract engineers who hold the required technical qualifications
- Provision upon completion of all appropriate documentation – installation certificates for your home information pack. This is vital if you sell your property in the future
- Peace of mind with a full back up service should the need arise, with warranty cover and / or the provision of an annual servicing going forward

Great stoves deserve competent and correct installation so that you can be sure they are functioning as they were designed to do. That way, you can enjoy your stove and rest assured that it is working to the best possible standard.

Ellesmere & Ludlow

Available in Compact, Standard and Wide Models

Multi-Fuel

Stoves in this range have steel bodies, cast iron doors and have the classic good looks the Ellesmere and Ludlow collections are well known for. They have been updated to ensure the very best aesthetics, enhanced performance and, importantly, they're 2022 compliant and DEFRA approved, giving you peace of mind that you have a stove that meets the very latest standards for efficiency and a cleaner burn performance. All of our new stoves achieve an A for energy efficiency with some models achieving A+.

The cleverly designed air control comes in a stunning stainless steel finish and allows you to switch between solid fuel and wood as well as controlling the air intake. The end result is fabulous controllability and a magnificent flame picture.

There are three sizes of Ellesmere and two sizes of Ludlow to choose from, with each having the option of top or rear flue connection. All models can burn wood and solid fuel.

AGA Little Wenlock Multi-Fuel

The much-loved Little Wenlock has been one of the best-selling stoves within the AGA range for over 40 years, due to its traditional styling and highly efficient heat output.

Designed for longevity, the latest Wenlock multi-fuel stove meets both current and future energy demands with 4.5kW output, A+ efficiency rating and 2022 Eco Compliant status.

With a cast iron door featuring AGA branding, steel outer body and ergonomic stainless steel handle, this stove beautifully combines style and functionality due to its simple operation and easy to regulate heat output.

It also benefits from a superior air wash system which optimises heat performance and helps to keep the stove window clean so you can enjoy the relaxing flame pattern.

Rayburn Stratus™ Fire Suites and Electric Fire Collection

There are few things as relaxing and evocative as watching a real fire flicker away. The mix of cosy warmth and beautiful flames guarantees to make even the chilliest of days snug and comfortable. The collection of Rayburn electric fires has been designed to emulate the restful appeal of the real thing. Offering the ultimate flame picture combined with controllable heat, a Rayburn Stratus™ fire gives both the look and cosiness you'd expect along with ease and efficiency.

It couldn't be easier with our range of fire suites to create the perfect focal point for your home. Available in three chic and stylish designs to fit all variations of the Stratus™ electric fires – there's something to suit every home. They need no building work and you don't need a chimney or recess. They're perfect for spaces where there are building restrictions and allow you to enjoy the welcoming appeal of a fire wherever you live.

Rayburn Stratus™ fires and fire suites are manufactured to the highest possible quality and the Stratus™ fires have vibrant, variable multi-coloured flame pictures, which allow you to set the style and mood, meaning you have a truly unique fire. With only a 13amp supply needed for the Stratus™ fires, you are guaranteed an easy installation for your home.

RAYBURN STRATUS™ SLIM AND EXTRA SLIM FIRE SUITES AND FIRES

These beautifully designed suites will fit both the slim and extra slim range of Rayburn Stratus™ fires. Available in a variety of sizes to suit your home.

RAYBURN STRATUS™ EXTRA TALL FIRE SUITE AND FIRES

Fires in this range offer increased height and surface area to create a real style statement. The Rayburn Stratus™ fire suite has been designed to perfectly showcase the fire for a real aesthetic appeal.

RAYBURN STRATUS™ TRU VIEW FIRE SUITE AND FIRES

Rayburn Stratus™ Tru view fire suite and fires give you the option to showcase a three sided view of the stunning flame picture. With a deep fire bed and over 60 flame pattern variations available, you can truly personalise your fire for your home.

HELPFUL ADVICE

There is an AGA stove to suit every size and style of room. We recommend that you discuss your requirements with an appointed AGA authorised stove stockist or qualified engineer, who will be happy to advise you on the heat output and choice of fuels best suited to your needs. For more details on AGA stoves or for help in choosing the right stove for you, please contact your local authorised stove stockist dealer.
